500+ Boreholes Drilled	**15+** Years Experience	**47** Counties Served	**300+** Clients Served

Our Services

Borehole Drilling — Rotary & percussion drilling engineered for Kenya's varied geology.

Hydrogeological Surveys — Geophysical siting so you drill where the water actually is.

Borehole Test Pumping — Yield and recovery testing so you know your borehole's real capacity.

Pump Installation — Submersible and surface pumps, sized and installed correctly.

Solar Water Pumps — Off-grid pumping systems for farms and remote sites.

Water Storage Tanks — Tank supply, stands and plumbing for reliable daily storage.

Water Distribution Systems — Piping networks that get water from source to tap reliably.

Borehole Rehabilitation — Reviving old, silted or low-yielding boreholes.

Borehole Maintenance — Scheduled servicing to protect your investment long-term.

Irrigation Systems — Drip and sprinkler design for farms of every scale.

Water Consultancy — Independent advice for institutions, NGOs and developers.

Industrial Water Solutions — High-volume supply engineered for factories and plants.
